

CPS Automotive Minimum Advertised Price Policy
Effective September 5, 2017

CPS Automotive has established a Minimum Advertised Price (MAP) Policy in an effort to maintain product integrity throughout the distribution network. The MAP Policy unilaterally imposed by CPS Products, Inc., addresses only the advertisement of product and pricing. It does not regulate selling prices and is not an attempt to control resale prices through our Distributor Partners. Distributors are free to sell CPS Automotive products at prices and terms at their sole discretion.

This MAP Policy encompasses CPS branded A/C equipment to include FX134a, FX1234, FX1234W, FX3030, FA1000 and FA1234 and additional products can be added to this Policy at the discretion of CPS Automotive. Please see attached Schedule A.

To comply with this MAP Policy, distributors, dealers, jobbers, and retailers must not advertise or promote (in all forms; i.e. print, internet, verbal) product to the end user listed in this Policy at prices less than pricing set in Schedule A below. Promoted pricing which includes gift cards, cash rebates, free goods, etc., must not net below the pricing set in this Policy.

Should a Distributor be found in violation of this MAP Policy, CPS will notify the Distributor and they will be given five business days to comply with this MAP. If the same Distributor is found to be in violation a second time, the Distributor will lose all advertising/promotional allowances for the CPS/UVIEW branded purchases for the quarter of the nonconformance. If continued violations are determined by CPS for the same Distributor, CPS may take additional action at their discretion which may include the cancellation of all Distributor orders for products listed in Schedule A. Additionally, orders may be refused from the Distributor on a temporary or permanent basis and existing orders may be held without processing.

Distributors should provide this MAP Policy to jobbers and customers to advise them of the consequences of failure to comply.
