Associated Equipment Announces Two New Adjustable Intellamatic® Smart Chargers

ST. LOUIS, MISSOURI – Associated Equipment Corporation (AEC) announces two new Intellamatic® Smart Battery Charger/Analyzer/Power Supply: Model IBC6008 and Model IBC6008MSK with Memory Saver Kit (MSK) for battery change out.

“The Associated development team is proud to introduce two truly innovative smart battery chargers, feature rich and flexible for the wide variety of vehicles and electrical systems professional technician’s must service today,” stated Kimberly Cottle, President and CEO of Associated Equipment Corp. “We developed the first US-made Intellamatic® smart charger for hybrid vehicles in 1999 and we’ve grown our offering for evolving vehicle batteries and their applications. With so many different battery types, including Enhanced Flooded or “Start-Stop” batteries, each requiring specific charging parameters; our customers started requesting adjustable smart chargers. We listened and developed the IBC6008 and IBC6008MSK in conjunction with both OE vehicle and battery manufacturers to fill a real need in this category. We are pleased to have approvals by all domestic OE vehicle manufacturers as well as European and Asian manufacturers for both chargers.”

The Models IBC6008 and IBC6008MSK Intellamatic® Smart Battery Chargers and Analyzers with Adjustable Power Supply Mode feature a four-line backlit digital display allowing technicians to adjust both the charging voltage and/or charging amperage based on vehicle and battery manufacturer specifications, safely charging almost all 12V battery types, including AGM and Lithium (SLI). The chargers feature a unique “Partial Charge Mode” and patented battery diagnostics enabling technicians to quickly check and charge batteries reducing service bay time. The 70 Amp Re-Flash Power Mode can be adjusted to specific voltages needed to perform extended vehicle diagnostics or ECU re-flash procedures per manufacturer specifications. Additional features include overcharge protection, Safe in Any Weather® operation, as well as both audible and visual alarms for reverse polarity indication protection, weak or defective battery, partial charge and complete charge.

Established in 1948, Associated Equipment Corporation designs, patents and assembles, in St. Louis, Missouri, a full line of battery charging, testing and portable power solutions, as well as booster cables and clamps, for automotive, aircraft and recreational vehicle use for a worldwide customer base. AEC designs, imports and quality assures product under ATEC® brand with unique packaging targeting commercial channels. Associated Equipment is committed to providing the highest quality battery service equipment to the professional tool and equipment distribution markets and professional technicians.

AEC also provides a full line of fume extractors, downdraft tables and ambient air cleaners for the welding industry under the Ace Industrial Products™ brand.
